

## Delivery Options October 2024

Our UK warehouse is well-situated and equipped to handle multiple inbound and outbound deliveries, every day. We deliver nationwide via trusted couriers.

### DX Transport

Delivered Exactly (DX) is a nominated courier based on its excellent span to deliver B2B parcels, packages, and consignments to customers throughout the UK and abroad. We use their dedicated Freight and Express services.

### Edge Transport

Committed to delivering excellent logistical solutions with its fleet of trucks and vans, we use North-West-based Edge Transport for larger orders. Edge also offers FORS logistics for deliveries within London, Ireland, and Europe.

### Parcelforce

Since 1986, Parcelforce has been the Royal Mail's arm of parcel and consignment delivery. We use their trusted business courier services to efficiently deliver your cable, wire, and accessory orders.

### Collection

With our collection service, we issue you a collection code as soon as your order is ready for dispatch. Share this code with the courier of your choice and, once they relay this code to our warehouse team, we'll load for transport.
